

> SafePay

"SafePay is a secure and reliable payment solution for accepting credit card payments over the internet".

For businesses with simple requirements, SafePay provides a secure and reliable payment solution that is easy to use and quickly integrates with standard website shopping cart applications. With SafePay, your customers have the convenience of buying goods or services from your website - 24 hours a day, 7 days a week.

Dialect is the market leader in comprehensive secure payments, providing payment solutions to thousands of merchants around the world, directly to customers like VirginBlue and HMV, and through some of the world's leading financial institutions, such as American Express, MasterCard and HSBC.

SafePay accepts all major credit cards and has links to all of the major banks.

"Thanks to SafePay, customers can make purchases through our website, at any time of the day or night, all year round including the heavy Christmas trading period."

Not just technology

Dialect believe technology should be viewed as a tool to help you do business. Our experienced payments team can guide you along the path to successful e-commerce. This includes working with your bank and web developers to ensure smooth and optimal integration. Once your e-commerce website is running, the Dialect support team continues to provide assistance in solving payment issues should they arise.

Don't want to store credit card details?

SafePay provides simpler paths to accepting online payments. You can choose to receive and store customers' credit card details. Alternatively, we can provide you with a customised payment screen for when your customer clicks the pay now or checkout button. This is particularly suitable for businesses who want to avoid having to provide extra security for storing of credit card details.

Benefits

- Real time authorisation of credit card transactions over the internet.
- All major credit cards accepted.
- Fast integration with standard websites and shopping cart applications.
- Easy hosted Web page option (3-party payments).
- Customer convenience - your customer can have access to purchase from your website 24 hours a day, 7 days a week.

Integrate with Your Existing Web Site

SafePay can be seamlessly integrated with newly developed or existing websites. It can also be integrated with many popular shopping carts, giving you maximum flexibility in branding your website.

Reporting and Checking Transactions

Printing reports, viewing transactions and performing refunds is made easy through the merchant administration.

"SafePay simplifies and reduces the cost of real time authorisation and processing of credit card payments over the Internet."

Stop Fraud with Verified by Visa™ and MasterCard SecureCode™

For additional authentication on the cardholder's identity, customers purchasing over the internet are asked to provide additional information, such as a password or PIN.

SafePay is fully certified to provide this feature for both Visa and Mastercard's schemes. Companies in Australia and the UK are currently benefiting from reduced online credit card fraud and chargebacks.

Easy Upgrade	Dialect provides an easy upgrade path to SafePay Enterprise, as your business expands and volume grows.
Security	Latest industry standards (Secure Sockets Layer SSL + and 128 bit encryption) are used to securely transmit Cardholder details. This is the same technology used by the world's largest banks. Our systems have been audited by both American Express and Mastercard globally.
Reliability	SafePay's service availability is provided at global industry best practice levels. We average above 99% so you can trust us to be up when the other processors are down!
Scalability	Dialect's proven technology is designed to cater for large volumes and provide reliable and responsive services during peak times. This provides a solution that has the ability to grow along with your business.
